TECHNOLOGY STACK

Backend & APIs:

Node.js, TypeScript, NestJS, Python (Flask, FastAPI), RESTful APIs.

Web Frontend:

JavaScript (ES6+), React, Vue.js (Vue 3), Angular, HTML5, CSS3, SCSS, Tailwind CSS.

Mobile Development:

Flutter, Dart, Kotlin, Native Android, BLoC.

Databases:

PostgreSQL, MySQL, MongoDB.

Cloud & DevOps:

AWS (S3, Amplify, CloudFront), Docker, CI/CD, Git, GitHub Projects.

ARCHITECTURE & QA

Clean Architecture, Microservices, Domain-Driven Design (DDD), Automated Testing (Jest, PyTest, JUnit), Code Reviews.

AGILE METHODOLOGIES

Scrum, Kanban, Shape Up, XP, Sprint Planning, Backlog Management.

DESIGN & UX/UI

Figma (Prototyping & Handoff to Code), Wireframing, Canva, Web Accessibility (WCAG).

EDUCATION

Computer Engineering

University of Valparaíso (2019–2026)

Specialization

Software Engineering, Digital Transformation, and Agile Methodologies.

CERTIFICATIONS

SoftServe Project-Lab

Kotlin Android Development (2026)

Client Management

Specialized Training (2021)

LANGUAGES

Spanish: Native

English: B2 (Technical / Workplace)

Korean: A1 (Beginner)

Ashly Yamilet Mazuela Ávalos

Computer Science and Engineer | Full Stack Software Engineer

PROFESSIONAL PROFILE

I hold a degree in Computer Engineering from the University of Valparaíso and am known for being a hardworking, practical, and organized professional. I possess a strong ability to learn quickly and solid experience in various university and professional software development projects, specializing in user experience and interface (UX/UI) design and full-stack development. My professional approach is focused on continuous improvement, the constant enhancement of technical skills, and the creation of scalable end-to-end digital solutions.

WORK EXPERIENCE

Project Management & Software Development Assistant

2026

Fondecyt Project 11251489 – Software Research “Model-Driven Development of Strategically Aligned Microservice-Based Applications”

- Direct support for the **management, oversight, and development of the project.**
- Technical coordination and tracking of deliverables using an agile workflow (**Kanban**), centralizing technical documentation and ensuring traceability.

Full-Stack Developer (Web, Mobile & Cloud)

2020, 2024–2025

Freelance & AI Alpha Analytics

- Provided freelance services in full-stack web development using **React, Vue 3, Node.js, TypeScript, NestJS**, and **Python (Flask/FastAPI)**.
- Development of cross-platform mobile applications using **Flutter/Dart** and native components in **Kotlin** under *Clean Architecture*.
- Configuration, architecture, and deployment of platforms in cloud environments using **Amazon Web Services (AWS)**: S3, Amplify, and CloudFront.
- Comprehensive design and implementation of a user interface for an adoption management platform developed in **Java** for an animal shelter.
- Modeling and implementation of relational and non-relational databases (**PostgreSQL, MySQL, MongoDB**), ensuring transactional integrity and query optimization.
- Ensuring stability through automated testing (**Jest, PyTest**) and collaborative code reviews using agile frameworks (**Scrum, Shape Up**).

UX/UI Designer, Graphic Designer & Web Developer

2021, 2024–2025

Freelance & Fablab UV (Fablab.UV.cl)

- Creation of high- and low-fidelity interactive prototypes for mobile and web systems using **Figma** and Canva.
- Conceptual and interface design for the official **AI Alpha Analytics** landing page and products, ensuring web accessibility (**WCAG**).
- Design of corporate graphic materials, visual identity, and promotional materials for robotics events and competitions **CR2 UV**.

Professional Internship

2023, 2025

FourDplan & AI Alpha Analytics

- Design and development of a multi-device responsive website, along with brand identity, logos, and a brand guide for AI Alpha Analytics.
- Compilation and drafting of specialized technical documentation for a BIM management system at FourDplan.

FEATURED PROJECTS

Analysis Platform & Intelligent Pipeline

Python | REST APIs | Microservices

Implementation of asynchronous processing pipelines using AI models (WhisperX, PyAnnote) for analysis and calculation of performance metrics.

Travel Booking App

Clean Architecture | Kotlin | Flutter

Mobile app with modular layered architecture, BLoC pattern, and local reactive persistence using Jetpack DataStore.
